Summary

Results-driven AI & Data Science undergraduate with hands-on ML internship experience and a strong record in hackathons. Skilled in building end-to-end machine learning pipelines, full-stack applications, and data-driven solutions. Seeking a Data Science / ML internship to apply and expand expertise in real-world environments.

Education

Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College	2024 – 2028
B.Tech in Artificial Intelligence and Data Science	CGPA: 8.5
S S Higher Secondary School	2016 – 2024

Skills

Languages	Python, Java, JavaScript, SQL
ML / AI	Scikit-learn, TensorFlow, PyTorch (basics), NumPy, Pandas
Data & Viz	Matplotlib, Seaborn, Power BI
Frontend	HTML, CSS, JavaScript, React Native, Flutter
Backend	Node.js, Express.js, REST APIs
Tools	Git, GitHub, VS Code
Core	Data Structures, Algorithms, Problem Solving

Achievements

- **Winner** – Aestr Alpha AI Summit Hackathon 2025
- **Runner-Up** – Ideaforge 3.0 Hackathon 2025
- **Finalist** in 3+ national-level hackathons with consistent AI-based solutions
- Grew **130K+** **LinkedIn reach** and **2000+** **connections** via technical AI content

Experience

- Machine Learning Intern** · National Small Industries Corporation (NSIC) Jun – Jul 2025
- Built **classification and regression models** (Random Forest, Logistic Regression) on a **10,000+ record dataset** using Scikit-learn, improving prediction accuracy by **18%**
 - Reduced model error by **15–20%** through **feature engineering**, outlier removal, and data preprocessing pipelines
 - Executed end-to-end **ML pipelines** from data ingestion to model evaluation using Pandas, NumPy, and Matplotlib for visualization
- Open Source Contributor** · GirlScript Summer of Code (GSSoC) 2026
- Contributed to open-source projects by fixing bugs, improving features, and collaborating with developers using Git and GitHub
 - Worked on real-world development workflows including pull requests, issue tracking, and code reviews

Projects

- AI Job Scraper & Opportunity Tracker** [View Code](#)
- Built **automated scraping system** using Python and REST APIs, aggregating **1,000+ listings**
 - Implemented **smart filtering** by role, skills, and location – improving relevance by **40%**
- TechCRM – Customer Relationship Management System** [View Code](#)
- Engineered **full-stack CRM** to manage customer data, leads, and communication records
 - Improved **team workflow efficiency by 30%** through structured data handling and dashboard UI
- InternFinder – Internship Discovery Platform** [View Code](#)
- Built **responsive platform** aggregating internship listings from multiple sources
 - Reduced discovery time with **domain-based filtering** and centralized search interface
- Weather App – Real-Time Weather Dashboard** [View Code](#)
- Developed **real-time weather app** consuming live REST API with **5-day forecast** display
 - Built **mobile-responsive UI** using HTML, CSS, and JavaScript with dynamic data rendering

Certifications

Azure AI Fundamentals: Machine Learning with Azure Services – Infosys Springboard	View Certificate
Mathematical Biostatistics Boot Camp 1 – Johns Hopkins University (Coursera)	View Certificate
Intro to Big Data, Data Science and Artificial Intelligence – Udemy	View Certificate
