

ANSH

Data Analytics Intern Candidate | Python • SQL • Business & Finance Analytics

Chandigarh / Mohali | 9034637401 | nextrgenansh@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data analytics intern candidate with a completed **real-world NIFTEM consumer preference project**. I connect customer conversations with Python, SQL, EDA, statistics, and visualization to convert raw feedback into decision-ready insights on flavour demand, purchase intent, and product opportunity.

TECHNICAL SKILLS

Programming & Data: Python, Pandas, NumPy, SciPy, CSV handling

Analytics: Data Cleaning, EDA, KPI Tracking, Customer & Sales Analysis

Visualization: Matplotlib, Seaborn, Dashboard-ready Business Charts

Database & SQL: MySQL, Joins, GROUP BY, HAVING, CTEs, Window Functions

Statistics: Descriptive Statistics, Correlation, Regression, Hypothesis Testing

Tools & Web Data: Jupyter Notebook, VS Code, Git, GitHub, BeautifulSoup, Requests

PROJECTS

Consumer Preference Intelligence Study – [National Level Avnesh Exhibition](#) (NIFTEM)

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, MySQL | **Dataset:** 240+ survey responses

- Collected, cleaned, and analyzed exhibition feedback to identify customer demand across milk-based and water-based beverage flavours.
- Found Mango as the strongest milk-based flavour; Lemon as the strongest water-based flavour, Blueberry showed strong secondary opportunity.
- Tracked product KPIs: flavour preference score, average rating, sugar vs non-sugar demand, respondent-type preference, and repeat purchase intent.
- Identified mostly positive purchase intent, strong demand for sugar-based variants, and a visible opportunity for non-sugar variants.
- Converted rating scores and feedback themes into practical business insights to understand customer perception beyond numbers.

Recruiter-ready result:

Recommended **Mango and Lemon as primary demand flavours**, Blueberry as a testable secondary flavour, and separate sugar/non-sugar positioning for wider customer coverage.

Retail Customer Behaviour Analytics – [Behind the Buy](#) (Ongoing)

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, MySQL, Statistics

- Analyzed customer purchasing data to identify trends and patterns using EDA technique
- Utilized **SciPy** to compute statistical measures (**mode**), improving analytical
- Applied top **10 analytical queries** to evaluate customer behavior, product performance, and sales trend
- Detected **95% correlation between key variables**, enabling feature reduction and improved model accuracy

[SnapScraper - Flask-Based Image Scraping tool](#)

Tools: python, flask, BeautifulSoup, Requests, HTML, OS Module, GitHub

- Developed and deployed a **Flask-based image scraping** application to extract and download images from [Google Image Search](#).
- Parsed HTML content using **BeautifulSoup** and handled HTTP requests using the Requests library, Automated image extraction and local storage with a structured folder-based system.

EXPERIENCE

[Avnesh National Level Exhibition](#) – NIFTEM | [Old Batra Lemon](#) | Feb 26–28, 2026

- Represented Old Batra Lemon at a national food exhibition; handled visitor interaction, product explanation, and feedback collection.
- Converted real customer conversations into a structured analytics project for flavour selection, customer understanding, and product decision support.
- Compared preferences across students, visitors, and food professionals to link on-ground business observation with data anal.
- Worked on real-time data analysis at a [National Exhibition](#) (NIFTEM, Feb 26–28, 2026), representing **Old Batra Lemon** while competing directly with top brands **like Nestlé, PepsiCo, and Tata**.

EDUCATION, SCHOLARSHIP & CERTIFICATIONS

B.Tech – Computer Science & Engineering

Specialization: AI & Data Science

Kurukshetra University | 2023–2027

CGPA: **8.0** | Class 10: **85.8%** | Class 12: **85.6%**

[Awarded 100% Tuition Fee Waiver Scholarship through HSTES based on academic merit.](#)

Certifications / Virtual Experience

- [Fidelity International Investment Management Virtual Experience](#)
- [Data Science Certification](#) – House Price Prediction using Python
- Currently pursuing Data Science Certification – iNeuron + PW Skills
